

Analyzer Reporting [ESS110]

Accelerated Learning Series

Duration: 1 Day

Delivery Method: Classroom (Hands-on Lab)

Skill Level: Basic

Course Description

This class provides end user training on the Analyzer product. The training emphasizes Ad-hoc and Template Reporting using Analyzer against Essbase databases. This course will cover topics including:

- Using Analyzer to access data in a multidimensional database
- Learning how to create ad-hoc reports that provide trend, financial, sales, and "what if" analyses
- Creating reports that include pivoting, traffic-lighting, sorting, ranking, filtering, and calculations

The course is logically broken down into concise topics giving the students an overall understanding of each subject. All information is presented with practical examples and exercises.

Audience

This class is intended for users who have little or no prior experience in accessing multidimensional databases for report generation, and who are interested in developing reports with Analyzer.

Prerequisite None.

Topics Include

OLAP Overview

- OLAP & Multidimensionality Overview
- OLAP Concepts & Terms
- Introduction to the Sample Database

Reporting and Analysis

- What's Available?
- Analysis Tools
- Spreadsheet Reporting
- Analyzer Reporting

Analyzer Overview

- What is Analyzer?
- Windows Client
- Java Web Client
- HTML Web Viewer
- Connecting to a database
- The Desktop
- Navigating the Environment
- Reports and Groups

Working with Report Groups

- Navigating Groups
- Introduction to Reports
- Spreadsheets and Charts
- Composite Reports
- Choosing a Report Right for You

Working with Analyzer

- Using Cube Navigator
- Exploring the Database
- Using Dimension Browser
- Creating Reports
- Rearranging Reports
- Managing look and feel
- The Information Panel
- Adding Calculations
- Setting up Calculations
- Using Traffic Lights to Spot Exceptions
- Analyzer Right-Click Options
- Formatting Data
- Using Report Manager
- Using Print Options
