

Essbase System Administration [ESS201]

Performance Solutions Series

Duration: 2 Days

Delivery Method: [Onsite](#), [HostSite](#)

Skill Level: Intermediate

Short Overview

This course delivers essential information to Essbase administrators to help with day-to-day operational activities. Students will learn important topics for configuring, protecting, maintaining, and optimizing their Essbase applications and databases. The curriculum focuses on essential subjects administrators need to know to begin effective administration of their complete Essbase environment. The course is logically broken down into concise topics giving the students an overall understanding of each subject. Information is presented through lecture, discussion, and practical examples and exercises.

Who Should Take This Course

Database Administrators of Essbase Applications and Databases, and Technical Support Personnel.

Prerequisite: Essbase Builder (ESS100) or equivalent experience with Essbase fundamentals topics.

What You Are Taught

- Administering Essbase applications and databases
- Managing the Essbase server and environment
- Optimization and performance considerations
- Automation techniques for routine tasks
- Managing security and users

Topics Include

Exploring the Essbase Environment

- Essbase Analytic Services Architecture

Administrating and Managing Essbase

- Routine Maintenance
- Starting and Stopping Essbase
- Managing Applications and Databases
- Managing Security
- Managing Database Integrity
- Backing up and Restoring Data
- Managing Kernel Settings
- Allocating Storage
- Estimating Disk Storage
- Estimating Memory Requirements

Essbase Performance and Optimization

- Optimization Techniques
- Monitoring Performance
- Improving Essbase Performance
- Configuring Caches
- Outline Optimization
- Optimizing Data Loads
- Optimizing Calculations

Process Automation

- Introduction to ESSCMD
- MAXL & MDX Overview

Troubleshooting and Diagnostic Tools
