

HCG Custom Applications with Hyperion®

Benefits of Frameworks

- Create dynamic solutions at a fraction of the cost.
- Create custom and personalized applications with pre-defined objects.
- Tailor applications specific to your business process.
- Achieve increased reliability and scalability.
- Increased ROI.
- Save time and effort in deploying new solutions.
- Gain higher user acceptability with little or no training.
- Realize business process improvement with significant cost savings
- Get control of your processes. Create solutions with a high level of maintainability and deployability.

SOFTWARE WITH ATTITUDE

Use HCG **Frameworks™** to transform your most difficult challenges into powerful and dynamic solutions for:

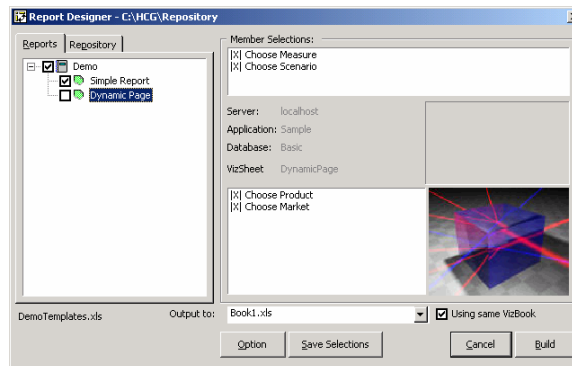

- **Reporting & Analysis**
- **Administration**
- **Process Automation**

Sophisticated Solutions, without a sophisticated price

To aggressively compete and remain successful, enterprises often invest in custom application solutions. Building systems on a framework of modular, open, and flexible objects will enable organizations to more quickly adopt and implement changes—without limiting their vision.

The HCG **Frameworks** team can design solutions that integrate all of your Hyperion® data with heterogeneous platforms. Our professionals are experts in architecting and integrating mission-critical, scalable applications that will save your organization time, money and costly mistakes. Our Frameworks solutions can integrate data from operational systems, analytic data, and the web, turning data into information that helps you run your business more effectively. These solutions leverage our Frameworks components and have a high level of acceptability.

Using the HCG Frameworks team, we will help you bridge the gap between your requirements and off-the-shelf applications.
